Bibliography on Schizophrenia

The bibliography that appears below is drawn from the Mental Health Abstracts database, produced by IFI/Plenum Data Company, 3202 Kirkwood Highway, Wilmington, DE 19808. The titles were selected for inclusion here on the basis of their direct relevance to schizophrenia: judgments about the quality of the article or book have been left to the reader. Due to space limitations, the Schizophrenia Bulletin has temporarily discontinued publishing the abstracts themselves; however, we hope to reinstitute this portion in the near future.

The articles listed below are not available from the Schizophrenia Research Branch, but are available for access through Dialog Information Retrieval Systems in reference departments of major university libraries and public libraries.
