The bibliography that appears below is drawn from the PsychInfo data base, produced by the American Psychological Association, 1200 Seventeenth Street, NW, Washington, DC 20036. The titles were selected for inclusion here on the basis of their direct relevance to schizophrenia. Judgments about the quality of the article or book have been left to the reader. Due to space limitations, the Schizophrenia Bulletin has temporarily discontinued categorizing the bibliography and publishing the abstracts themselves; however, we hope to reinstitute this portion in the near future.

The articles listed below are not available from the Schizophrenia Research Branch, but are available for access through reference departments of major university libraries and public libraries.

Boyarshinova, T.N. (No address given) Role of psychological factors in social and working adaptation of patients with slow-progressing schizophrenia. Zhurnal Nevronatologii i Psikhiatrii, 82(12):1837-1843, 1982.

Coffey, C.E.; Sullivan, J.L.; and Rice, J.R. (Dept. of Medicine, Duke University Medical Ctr., Durham, NC 27706) T-lymphocytes in schizophrenia. Biological Psychiatry, 18(1):113-119, 1983.

Davidhizar, R.E. (Memorial Hospital School of Nursing, South Bend, IN 46601) Tool development for profiling the attitude of clients with schizophrenia toward their medication, using Fishbein’s expectancy-value model. *Issues in Mental Health Nursing*, 4(4):343–357, 1982.
