The bibliography that appears below is drawn from the PsychInfo database, produced by the American Psychological Association, 1200 Seventeenth Street, NW, Washington, DC 20036. The titles were selected for inclusion here on the basis of their direct relevance to schizophrenia. Judgments about the quality of the article or book have been left to the reader. Due to space limitations, the Schizophrenia Bulletin has temporarily discontinued categorizing the bibliography and publishing the abstracts themselves; however, we hope to reinitiate this portion in the near future.

The articles listed below are not available from the Schizophrenia Research Branch, but are available for access through reference departments of major university libraries and public libraries.

Beitchman, J.H. (Royal Ottawa Hospital, Ontario, Canada) Childhood schizophrenia: A review and comparison with adult
Beninger, R.J., and Hahn, B.L. (Queen's University, Kingston, Canada) Pimozide blocks establishment but not expressions of amphetamine-produced environment-specific conditioning. Science, 220(4603):1304–1306, 1983.

Braff, D.L.; Glick, I.D.; and Griffin, P. (Dept. of Psychiatry, M-003, University of California-San Diego, School of Medicine, La Jolla, CA 92039) Thought disorder and depression in psychiatric patients. Comprehensive Psychiatry, 24(1):57–64, 1983.

Chapin, K.J. (Wayne State University, Detroit, MI 48202) Incidence of possible marker and symptom variables in schizophrenic, affective, and normal groups. Dissertation Abstracts International, 43(11-B):3727, 1983.

Greenberg, J.S.; Brown, W.A.; Laughren, T.P.; and Krantz, J. (Veterans Administration Medical Center, Providence, RI 02908)

Harrow, M.; Silverstein, M.; and Marengo, J. (Dept. of Psychiatry, Michael Reese Hospital and Medical Center, 29th and Ellis Ave., Chicago, IL 60616) Disordered thinking. *Archives of General Psychiatry*, 40(7):765-771, 1983.

Meltzer, H.Y., and Luchins, D.J. (Dept. of Psychiatry, University Hospital, 2074 Abington Rd., Cleveland, OH 44106) Platelet MAO and family history in schizophrenia: Method and madness. Psychiatry Research, 8(1):83–85, 1983.
