All materials published in the Schizophrenia Bulletin are in the public domain unless otherwise noted.

Manuscripts will not be considered for publication in the Schizophrenia Bulletin if the material has been previously published or is being considered for publication elsewhere.

Preparation of Manuscript

A detailed set of instructions for manuscript preparation is available from the Research Projects and Publications Branch (see address above).

Text and Tables: Type the manuscript and references (double spaced) on one side of the page, and submit in quadruplicate—one copy an original and the other three photocopies. Present each table on a separate sheet. Note the table number in the text immediately after the paragraph in which it is described.

Abstract: Provide a brief abstract of the manuscript. The abstract should not exceed 175 words in length.

Illustrations: Submit one copy of each chart, graph, or other illustration in reproducible form (either glossy or computer-generated laser prints). Refer to all illustrative materials as text figures. Type the figure number and legend for each on a separate sheet.

References: Include a list of all articles and books cited in the text. Arrange alphabetically by major author. When referring to these sources in the text, place the authors’ names and the date of publication in parentheses immediately after the idea referenced. If more than one source is cited, list in chronological order by date of publication. (If authors’ names are used in the same sentence, place only the date of publication in parentheses.) Provide page numbers for all quotes. Spell out all journal titles. Bibliographic style should follow that used in articles in this issue.

Footnotes: Use footnotes to clarify textual material, and indicate them by superior figures in the text. Insert footnotes as separate paragraphs immediately following the paragraphs in which they are mentioned.

Author Identification: Include your own and each author’s official title and academic degrees. Specify the address to which reprints should be sent.
