About the Cover

The Schizophrenia Bulletin features art done by current and former mental hospital patients. Breath of Breath is the title of the art on this issue’s cover. This artist’s work has been shown in her hometown as well as in Washington, D.C., Los Angeles, and Brussels, Belgium. The artist provided us with the following:

With artwork I continue to invent a system of survival with chronic illness. My artwork connects me with the community. It gives me wholeness.

Erratum

The article by Lay et al., entitled “The Psychosocial Outcome of Adolescent-Onset Schizophrenia: A 12-Year Followup” (Schizophrenia Bulletin 26(4):801-816, 2000) contains errors in the Contents page and pages 806 and 809. The title of the article was incorrect on the Contents page and on the back cover; it was correct on page 801. The second sentence below Educational/Occupational Outcome should read (correction in bold): For comparison, the rate of achievement of different diplomas in the German population between the ages of 25 and 30 (Zentrum für Umfragen, Methoden und Analysen 1995) is given (figure 1B; white bars). On page 809, the title of figure 2 should read: Profiles of social disability (DAS score ≥ 2) for males and females with schizophrenia at followup.
