About the Cover

Rochelle Johnson
In 1999 I was hospitalized because I was hearing voices and was later diagnosed with schizoaffective disorder. Even though I had a degree in art, it was not until after my diagnosis that I started to pursue it seriously. At first, painting was a way to quiet the voices, to bring more balance and focus to my life after it had been turned up-side-down by my illness. Now, with medication and my doctors help, I paint for the pure joy of creating something beautiful and expressing myself and my perspective. To see more of my work, visit my website at www.RochelleJohnsonStudio.com.
