Schizophrenia-Related Grants—Fiscal Year 1981

The National Institute of Mental Health (NIMH) administers the Federal Government's major program of support for research in mental health. NIMH conducts and supports research in the etiology, treatment, and prevention of mental and emotional illnesses and research on many public health problems related to mental health. The many biological, genetic, psychological, social, and environmental factors which affect and shape mental health and mental illness are studied through NIMH-supported research in hospitals, universities, mental health centers, and community settings.

The research, services, and training grants that appear below were selected for inclusion here on the basis of their direct relevance to schizophrenia. Each grant or contract has been categorized under the administrative component of NIMH that is involved with its funding and monitoring: the Division of Biometry and Epidemiology, the Division of Extramural Research Programs, the Division of Mental Health Service Programs, and the Division of Special Mental Health Programs.

**Division of Biometry and Epidemiology**

**Epidemiologic Catchment Area—Duke University**
MH 35386; $352,378
Blazer, Dan G. III
Duke University
Durham, NC

**Measurement of Untreated Psychiatric Disorder**
MH 10328; $156,553
Dohrenwend, Bruce P.
Columbia University
New York, NY

**Hospitalization of the Chronic Mentally Ill**
MH 34743; $100,000
Hargreaves, William A.
University of California
San Francisco, CA

**Epidemiologic Catchment Area—L.A., Hispanics and Anglos**
MH 35865; $313,302
Hough, Richard L.

**University of California**
Los Angeles, CA

**Epidemiologic Catchment Area—East Baltimore**
MH 33870; $1,015,649
Kramer, Morton
Johns Hopkins University
Baltimore, MD

**Epidemiologic Catchment Area Program**
MH 33883; $769,165
Robins, Lee N.
Washington University
Saint Louis, MO

**Use of Primary Care by Children Under Psychiatric Care**
MH 33646; $127,966
Starfield, Barbara H.
Johns Hopkins University
Baltimore, MD

**An Epidemiological Study of "Atypical Schizophrenia"**
MH 31673; $176,394
Tsuang, Ming T.
University of Iowa
Iowa City, IA

Canadian Journal of Community Mental Health

The Canadian Journal of Community Mental Health, to be published twice a year, will provide a much needed forum for Canadian scholars and practitioners with interest in the promotion of positive mental health and the prevention of mental health problems in community settings. The Journal is an interdisciplinary forum devoted to the sharing of information and the creation of elements of reliable and valid knowledge about phenomena pertinent to the mental well-being of Canadians and their communities.

Study areas of priority interest to the Journal include program evaluation in human services, community needs assessment, community development, social action, self-help, community education, consultation and advocacy. Submissions for publication may include descriptions of exemplary community programs, policy analyses, theoretical articles, research reports, literature reviews, and items for our “news and notes” section.

The Journal is a nonprofit enterprise and will receive articles in both French and English with the abstracts of the other language published in each instance.

Subscription rates for two issues a year are as follows: Institution $30.00; Individual $20.00; Student $15.00.

Please make checks for journal subscription payable to the Canadian Journal of Community Mental Health and mail to Alex Porteous, Managing Editor, CJCMH, 1364 McTavish Rd./R.R. #2, Sidney, B.C. V8L 3S1, Canada.
